

SMART FARM[®]

AGFEST SPECIAL

Crop Farming Pack

\$11,150

Agfest special price valid until the 31st of May 2023. Prices are excluding GST.

The Crop Farming Starter Pack gives you the basic building blocks to get started with your Smart Farm. Our starter pack includes your first LoRaWAN gateway to provide remote monitoring capabilities across your farm and kick-start your smart monitoring journey.

What you get

Industrial grade IP67 LoRaWAN Gateway connected to our LORIoT network. The gateway needs to be connected to your home internet and installed on a roof.

A full **Weather Station** will let you know how much water and evaporation your farm is experiencing so you can manage your irrigation more efficiently.

Dam Level sensors let you track your water supply level and forecast your water supply level.

Pipe Pressure monitors let you monitor the effectiveness of your irrigation network. Detect leaks, breaks or failing pumps.

Deploy **Soil Moisture** probes to track the effectiveness of your irrigation practices.

Track the end of your **Pivots** to notify you of your pivot stopping mid-cycle.

All your data will be securely captured in your own cloud based platform. 12 months access is included in the pack, then \$91 per month.

THE CROP FARMING STARTER PACK INCLUDES:

1x Outdoor LoRaWAN Gateway

Milesight UG67 LoRaWAN Gateway

1x Weather Station

Milesight WTS506

1x Dam Level Sensor
