

SMART FARM[®]

AGFEST SPECIAL

Farm Safety Pack

\$3,650

Agfest special price valid until the 31st of May 2023. Prices are excluding GST.

The Farm Safety Starter Pack gives you the basic building blocks to get started with your Smart Farm. Our starter pack features your first LoRaWAN gateway to provide remote monitoring capabilities across your farm, and kick start your smart monitoring journey.

What you get

Industrial grade IP67 LoRaWAN Gateway connected to our LORIoT network. The gateway needs to be connected to your home internet and installed on a roof with good visibility of your farm.

GPS Trackers attached to quadbikes, tractors or other farm machinery can track runtime, monitor fuel levels (optional) and detect rollover events. Know that your workers or family members are safe with rollover detection and real-time locations.

Smart Smoke Detectors can monitor out-buildings and sheds for fire, alerting you instantly if smoke is detected.

All your data will be securely captured in your own cloud based platform. You can monitor assets in real-time and setup alarms to notify you of issues. 12 months access is included in the pack, then \$89 per month.

THE FARM SAFETY STARTER PACK INCLUDES:

1x Outdoor LoRaWAN Gateway

Milesight UG67 LoRaWAN Gateway

2x GPS Trackers

Digital Matter G62

2x Smoke Detectors

Netvox RAO2A
